Dear Mr. Quaranta:

This is in reference to your letter dated November 11, 2003 requesting an additional 60 day extension to run concurrent with the 30 days we granted on October 12, 2003.

As indicated before, we recognize the complexity of a grid study. The information we requested is necessary in order for us to properly evaluate the impacts of your proposal as required by NEPA. Mr. Link, your Permit and Compliance Officer and Mr. Rick Henderson of my staff have discussed the information you have provided to date. Of particular concern is the fact that the study corresponds to an 8 megawatt proposal which is significantly less than the 560 megawatts originally proposed or the 35 megawatts you have indicated you are going to scale back to. It is important that the grid information you provide in response to our request is for the total number of megawatts you intend to generate. As such, we are granting you an additional 60 day extension.

Please notify us in writing should you need additional time beyond the January 15, 2004 deadline. If we do not receive the requested information by this date or another request for an extension, we will assume that you no longer wish to pursue a permit for this project and will withdraw your application.

Should have any questions regarding this letter, please contact Mr. Rick Henderson of my staff at (757) 441- 7653.

Sincerely,

Bruce F. Williams
Chief, Northern Virginia
